Room components instruction: Audio/ Video menu

Starting Audio and Video
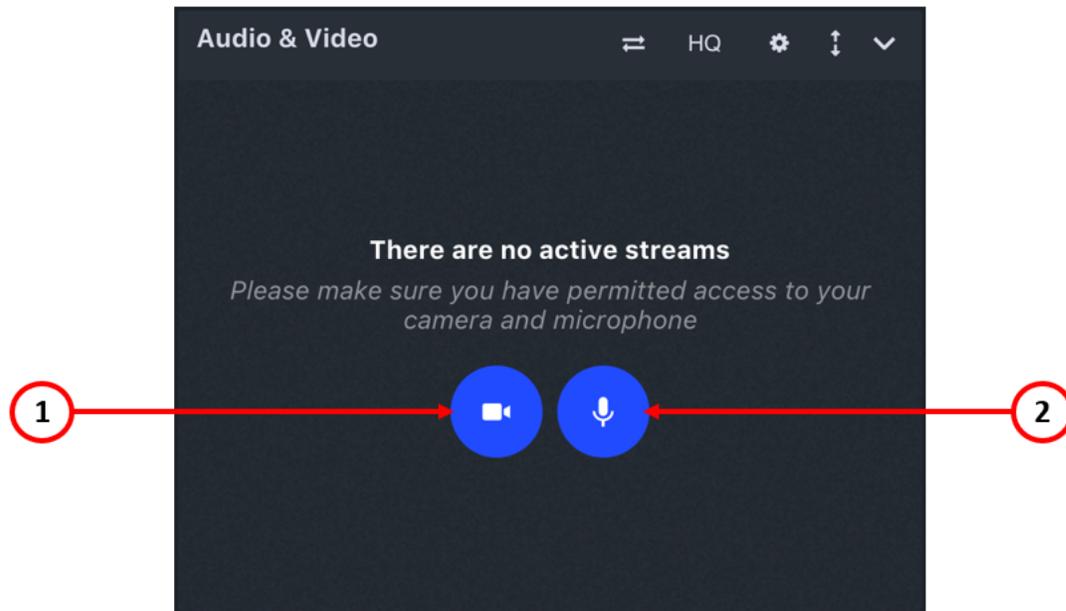

1. Start Audio and Video – after joining a room, you should enable Audio and Video in order to start broadcasting (see Audio and Video broadcasting)
2. Start audio – starts only Audio mode

Audio and Video broadcasting
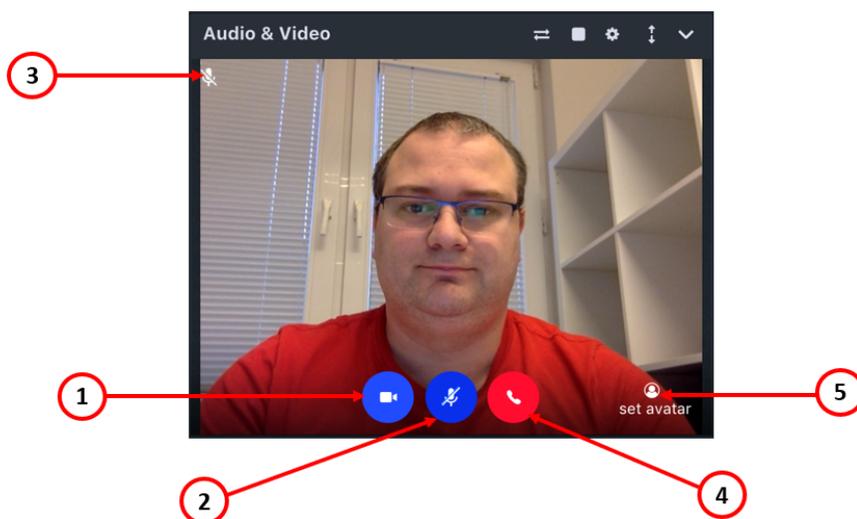

1. Stop Video – pressing this button will stop the video broadcasting only
2. Stop Audio – stops only microphone
3. When the microphone is stopped, it's shown here crossed out
4. Stop Audio and Video – switches off both audio and video
5. Set Avatar picture – you can put an Avatar picture instead of video broadcasting. It's also available in the Settings menu (see below)

Audio and Video menu and settings
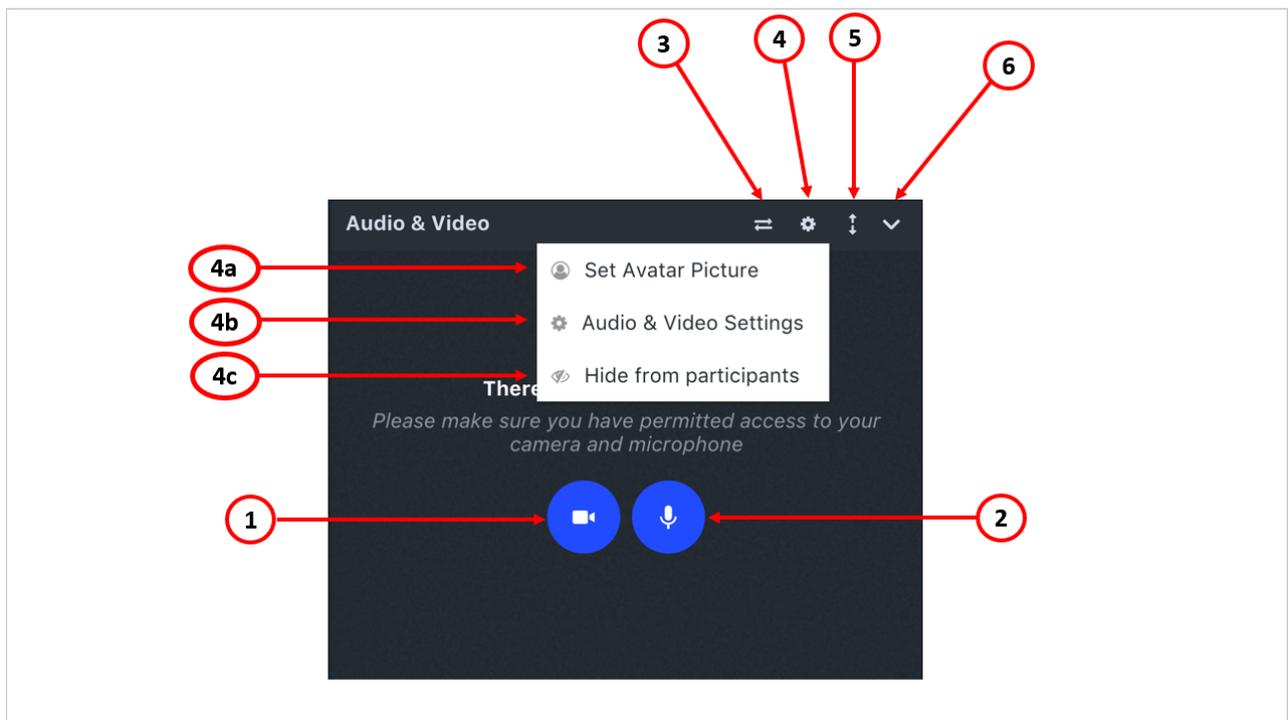

1. Start Audio and Video
2. Start Audio
3. Expand Video – opens the Video in the main window
4. Settings
    A. Set Avatar picture - allows you to place a picture from your PC, which will be shown instead of the video. You simply need to choose it.
    B. Audio and Video settings - gives you options for setting the camera and the microphone (see additional explanations)
    C. Hide from participants – allows to hide the chat from the participants
5. Expand/ collapse Video – makes the Video window smaller or bigger
6. Hides the A/V window

Additional explanations:

4.

    B. Please note that the shown options for Audio and Video settings are different, depending on the configuration that you are using. If during the session you connect a different device (camera or microphone), you have to go again to the "Settings" and choose from the options which you will be given there.
